

Step 1: Create a Wallet

Download and install Trust Wallet from <https://trustwallet.com> (don't use other websites).

Open the app and **create a new Multi-Coin Wallet**.

Store your 12-word Seed Phrase safely & offline.
NEVER share your 12 words with anyone.

Step 2: Add Stopelon to the Wallet

Tap the icon in the top-right. In the next screen search for **Stopelon**. If it doesn't appear, scroll to the bottom and tap **Add Custom Token**.

A. Tap **Ethereum** next to "Network", and change it to **Smart Chain**.

B. Paste the contract address **0xd83ceec69ed9d8044597a793445c86a5e763b0e3d** in the "Contract Address" field.

C. Next, type **Stopelon** as the name, and **STOPELON** as the symbol. **Decimals must be 9.**

Click **DONE** at the top and you should now have **Stopelon** added to your wallet as in the image below.

Step 3: Buy “Binance Smart Chain” (BSC)

Tap **Smart Chain** on the main screen of Trust Wallet, then after the screen on the left shows up, tap **BUY** on the top-right corner.

This step may require KYC verification, so have documents ready to prove your identity.

If the transaction doesn't go through, you may need to contact your bank to allow **International Transactions**.

After purchasing, there might be a delay while your transaction is processed. **Be patient, this is normal.**

Step 4: Swap BSC for Stopelon

iPhone users, follow the link below for steps to access and connect to PancakeSwap:

<https://community.trustwallet.com/t/walletconnect-mobile-linking-with-trust-wallet/36554>

Then follow instructions below starting from A.

Android users:

Once your BNB transaction finishes, tap **DApps** on the bottom of the main screen.

Once inside **DApps**, scroll down to the “Popular” section and tap **PancakeSwap** to open it.

A. Tap the icon next to the title on top and set it to **Smart Chain**.

B. **Connect your Trust Wallet** in the top-right.

C. Click the icon next to “Exchange” and **set Slippage to 12%** by typing it in the field. Click **X** to save & close.

D. On the “To” field type the contract address **0xd83cec69ed9d8044597a793445c86a5e763b0e3d** to select and import the Stopelon contract.

Once “Slippage Tolerance” is set to 12%, and you have set the BNB amount you wish to swap for **Stopelon**, tap **SWAP** and wait for the transaction to clear. **This process may not be instant** and can take anywhere from a few minutes up to an hour sometimes, depending on traffic.

Once the transaction has been cleared, you should have **Stopelon** in your **Trust Wallet**.

Welcome to the Stopelon movement!
