## What is Stopelon?

# Stopelon is a community-driven movement to **STOP** the biggest market manipulator of them all.

### WHY DO WE NEED TO STOP ELON MUSK?

Elon Musk is infamous for irresponsibly manipulating the cryptocurrency market with his Twitter account. On May 13<sup>th</sup> 2021, he tweeted that Tesla would cease to accept Bitcoin as payment causing a massive crash across the entire crypto market.

Anyone with even a shred of critical thinking sees through his lies. He has been trying to pump crypto for ages, tweeting about it to end, and even going on Saturday Night Live as a last resort to get Dogecoin up. It was ridiculous.

He's toying with people's portfolio like candy, like the narcissistic billionaire he is and always will be.

We said ENOUGH! Hence, we created **Stopelon**.

**All you have to do to JOIN THE MOVEMENT is BUY and HODL!**

## Stopelon Goal

**Our goal is  
to own a  $\frac{2}{3}$  voting  
supermajority in Tesla  
and fire Elon Musk.**

**We can do this by establishing a “Stopelon Voting Trust”** which will effectively allow our developers to acquire shares under this trust with the marketing wallet.

Additionally, Tesla shareholders who agree with our message can pledge their shares to the trust or on our future staking platform. They will be rewarded individuals who are a part of the trust with **Stopelon**, and will be working out logistics once it is in place.

Once we achieve  $\frac{2}{3}$  supermajority we will use our voting power to support workers rights and allow for unionization which has been blocked for years. Our ability to control Tesla would also allow us to re-enable Bitcoin purchases for vehicles and commit company resources to improving green energy solutions for Bitcoin mining.

# 1 Trillion \$STOPELON were initially minted.

**43% were burned** to make it deflationary  
(sent to BSC dead address)

Manual and automatic burns will be done throughout the movement's existence.

**5%** were sent to our Marketing Wallet

**5%** were sent to our Developer Wallet

**47%** were used to create our Liquidity Pool

**No new tokens** will be minted/created.

## Stopelon Tokenomics

# 10% Tax distribution

This current distribution setting is necessary to grow our LP to Market Cap ratio to support a resilient price floor at the beginning of the project. In order to make sure our holders are not penalized by this initial taxation while growing our LP, we decided to exclude the Burn Wallet (48%), the Marketing Wallet (5%) and the Dev Wallet (5%) from the Reward.

**Thus, the 2% are split to only 40% of the total supply**, making an effective ~5% reward to holders (instead of the future 6%).

Once we have achieved a solid LP to MC ratio (our target is 10%), we will redistribute 6% to holders and 4% to LP.

**We will enable “automatic burning”** by including the burn wallet in the redistribution at this point.

## Stopelon NFT Rewards

# Monthly NFT Rewards for all Holders

In an effort to drive our movement forward and to ensure that our holders are not only rewarded with tax distribution, we are now unveiling our first NFT segment: **monthly time-limited and exclusive NFT featuring prominent figures of our modern history!**

Every month, holders will receive an NFT based on their holding ranking\*:

Ranking will be decided through a random snapshot taken within the last 3 days of the month, and definitive ranking will be published within the first 2 days of the new month!

\* Dead Wallet, Marketing Wallet, Dev Wallet and Stopelon LP Contract will be excluded from the ranking.
